Miami
PURE WHITE CABINETS

Miami PURE WHITE CABINETS

A wonderful product is created or composed of fine materials and accurate workmanship, but far above and beyond these are the ideals, vision and intention of its maker, which governs the limit of your satisfaction.

In this catalogue we are listing a varied line of bathroom and other cabinets together with steel framed mirrors and mirror combinations that, we honestly believe, have never been equalled or approached heretofore. The products shown herein are the result of a quarter century experience in the fabricating and finishing of metal.

MIAMI CABINETS are made from ARMCO steel and are indestructible. Unlike the old style unsanitary built-in wood cabinet, they will not warp, sag, shrink or swell with the varying temperatures of the bathroom.

MIAMI CABINETS are made in many styles and sizes which reflect our ideals and interpretations of the art of cabinet construction. The illustrations herein are representative of the most popular models—for homes, hotels, apartments, hospitals, seminaries, college dormitories—in fact, we have a cabinet for every purpose or requirement regardless of price, ranging from the famous DE LUXE, AMERICA'S PREMIER BATHROOM CABINET, for the exclusive home, to a model suitable in price for the speculative tenement.

The Bathroom Cabinet is more universally used than any other piece of furniture. It contains family remedies, numerous toilet articles—from the Master's favorite shaving set to the baby's tooth brush. Therefore, the designer of Miami Products has kept constantly in mind sanitation, convenience, quality and beauty of design.

The interior is so arranged that all shelves may be removed quickly so that the entire surface may be thoroughly scrubbed and cleaned. The shelves are adjustable to accommodate a variety of bottles or receptacles. The exterior design is ornamental and in harmony with the tub, lavatory and other accessories.

MIAMI CABINETS are finished in "Crystal Snow"—a distinctive and exclusive Miami Process. It is not a BAKED-ON ENAMEL but of a Pyroxylin nature that produces a permanent marble-like finish, non-tarnishing and absolute proof against acids, iodine or medicine stains. While most standard specifications call for a pure white finish, any color or tint to match tile or color scheme may be had at a slight additional cost.

MIAMI CABINETS are all equipped with heavy air cushion doors. Miami hinges are of special design and made of solid brass. All Cabinets are equipped with special bulb edge glass shelves. Miami Mirrors are of the best quality obtainable, highly silvered and polished. The ideals of our organization are reflected in every cabinet, the same fine materials and careful workmanship are used regardless of price.

The models shown herein are of standard specifications. We are equipped to design and manufacture special cabinets of every description where the quantity warrants. Specifications and prices will be furnished on request.

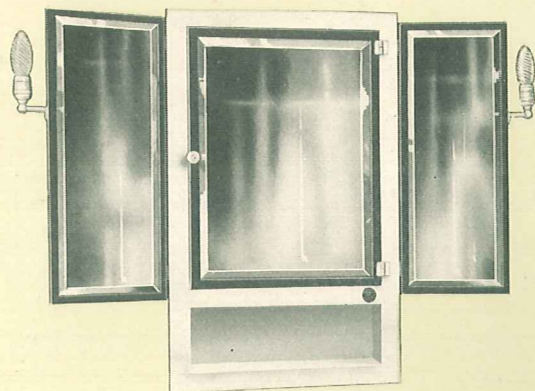

On page 16 will be found further details of construction and information on installation.

SALES OFFICES IN ALL PRINCIPAL CITIES

Miami DeLuxe

Miami
PURE WHITE
CABINETS

Miami DeLuxe
America's Premier Bath Room Cabinet

THE Miami DeLuxe has been characterized by one of the foremost American Architects as "A splendid example of architectural ingenuity, embracing the rare dignity of a masterpiece, yet cleverly complete in all of its appointments."

The spacious body of the cabinet is gracefully formed from one piece of steel. It has inside dimensions of four and three-eighths inches in depth, sixteen and three quarter inches in width, and twenty-two and three quarter inches in height. A recessed shelf at the bottom four and three quarter inches deep, sixteen and three quarter inches wide, and seven inches high affords an excellent temporary receptacle for electrical equipment or toilet articles.

Mirrors

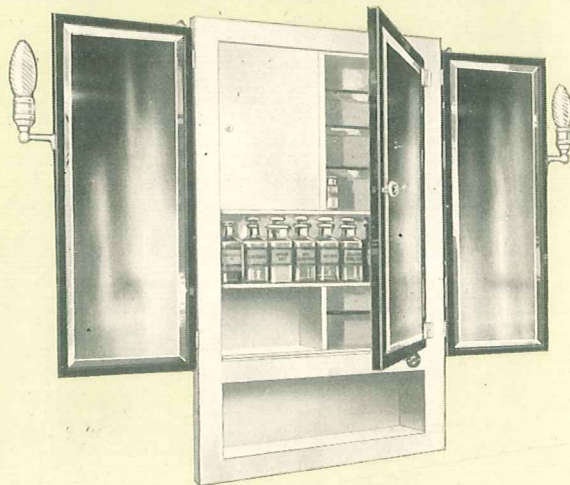

The Master Mirror of imported plate, is highly polished and silvered. It is sixteen inches wide, twenty-two inches high, and has a beautiful one inch bevel. The door is three quarter inch thick with a seven-eighth inch steel margin surrounding the mirror, finished in hand-rubbed black, giving the appearance of ebony.

On either side of the cabinet is a swinging wing-mirror, mounted in a steel frame—ebony finished. The mirrors are nine inches wide and twenty-four inches high with a one inch bevel. These wings are adjustable to any desired angle, thus permitting perfect vision of any portion of the head or body.

Interior

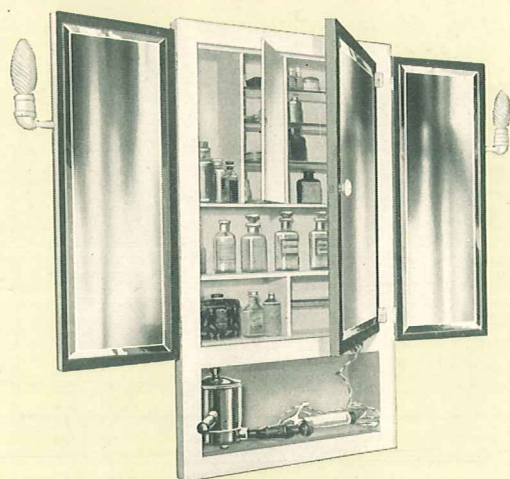

The adjustable shelves of heavy crystal glass with round bulb edges are both beautiful and convenient.

The locked compartment is eight and one quarter inches wide and twelve inches high. The shelves are designed to accommodate a full quart bottle and three adjustable shelves may be arranged to suit your convenience. This compartment is a safe repository for poison medicines or articles of a private nature.

Miami DeLuxe Interior

"THE FINISH THAT WILL NOT RETAIN A STAIN"

Miami DeLuxe Interior

**Miami
PURE WHITE
CABINETS**

Electrical Equipment

The graceful contour of the cabinet is greatly enhanced by small electric lights conveniently located on either side of the adjustable wings. These flood the mirrors with a substantial, yet subdued, light with no glaring reflections.

An electrical receptacle is conveniently located to supply current for all electrical appliances such as curling iron, water heater, etc. A small toggle switch, controlling the lights, is conveniently located at the bottom of the cabinet.

Finish

The color scheme is a beautiful contrast in black and white. The mirror frames, and door knob are in ebony black, while the cabinet proper, including the interior, is finished in Crystal Snow, giving it the appearance of polished marble.

This finish is not ordinary baked enamel, but a Miami Process built up from a chemically pure steel surface. It is of a Pyroxylin nature, and we guarantee it to be absolutely proof against stains or acids of any nature. Any color or tint may be had at small additional charge.

Installation

The DeLuxe Model may be installed in new homes or homes already built by any ordinary carpenter and electrician.

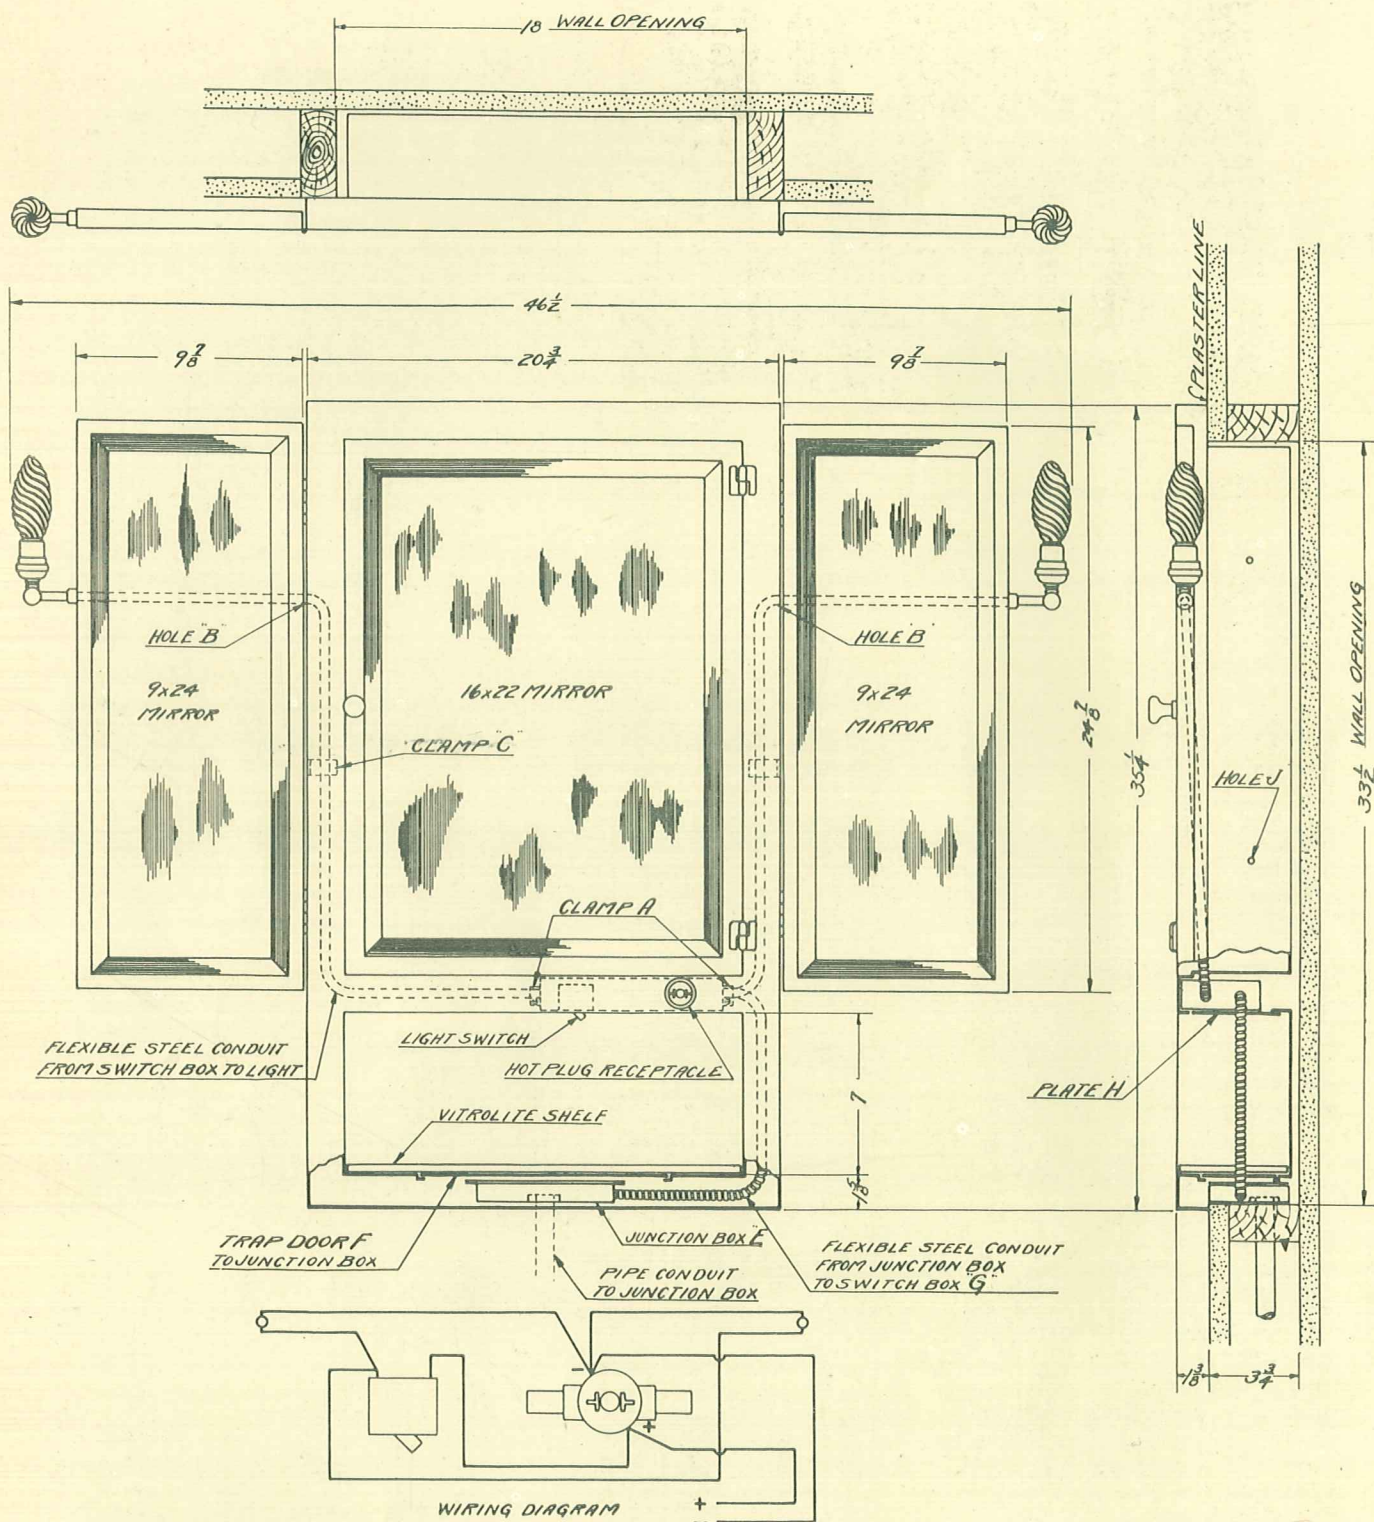

The house wires should be brought to the bottom of the wall opening (see chart page 4) either in conduit or loom and securely attached to a junction box furnished with the cabinet—the connection is easily made in the junction box after the cabinet is set in place.

The wiring is all concealed, yet all connections to switch, receptacle or house is easily accessible through concealed trap doors in top and floor of the lower recess shelf.

The DeLuxe may be installed in plaster, marble, tile or vitrolite walls.

"THE FINISH THAT WILL NOT RETAIN A STAIN"

INSTALLATION INSTRUCTIONS DE LUXE

- 1 Remove Clamp "A" from conduit on each wing.
- 2 Run conduit through hole "B" in body flange.
- 3 Fasten hinges to body with 8-32 screws furnished.
- 4 Run conduit under Clamp "C" back of flange to switch box and fasten in with Clamp "A."
- 5 Remove Plate "H" in top of lower recess and remove switch and hot plug receptacle box.
- 6 Make connections to receptacle as shown in wiring diagram.
- 7 Set Junction Box "E" in wall opening as shown and fasten to house conduit or loom with wire extending about six inches.
- 8 Set Cabinet in wall and remove Trap Door "F" in bottom of lower shelf.
- 9 Bring conduit "G" to junction box "E" and fasten with clamp furnished.
- 10 Make connections of house wires to wires in conduit "G"
- 11 Raise cabinet up in wall opening so it does not rest on junction box "E" and fasten into wall through holes "J" using 1 1/4 round head wood screw and recessed washers furnished with cabinet.

The DeLuxe Junior

Miami PURE WHITE CABINETS

The Miami DeLuxe Jr.

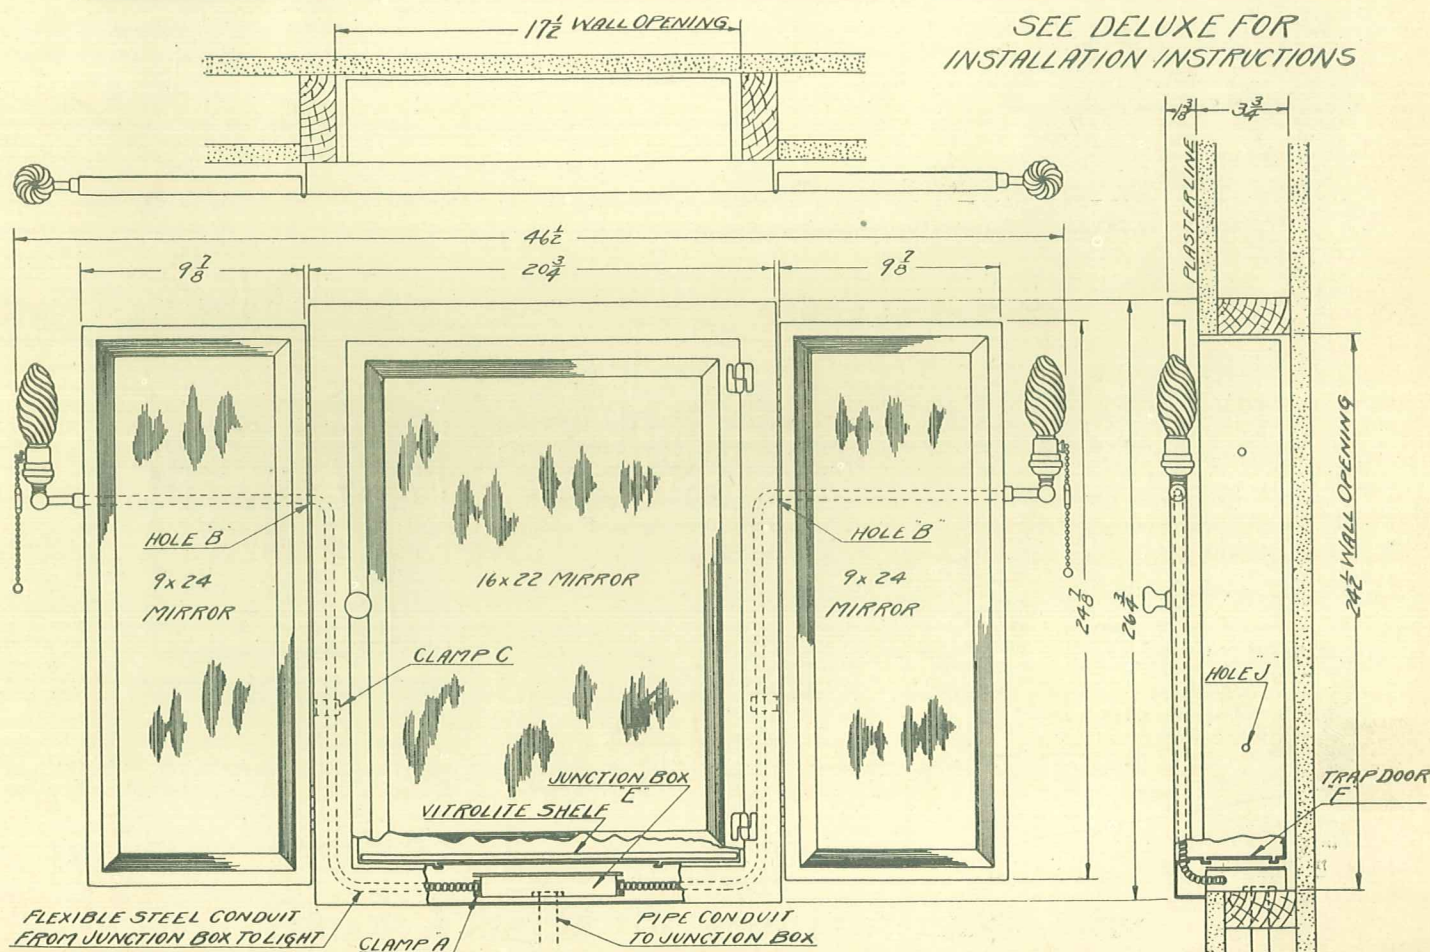

The Junior has the same high grade construction as the DeLuxe. It has the locked compartment and same interior arrangement. It is of the full door design and does not have the lower recess shelf.

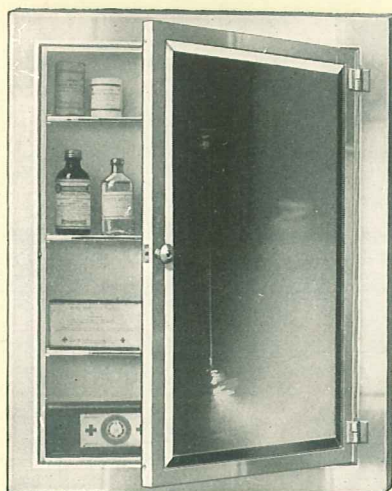

Electrical equipment consists of pull chain lights on each wing of same general design as the DeLuxe.

Finished in "Crystal Snow"—the regular specifications are all white. Any color or tint may be had at slight additional cost.

INSTALLATION INSTRUCTIONS

Model No. 100

**Miami
PURE WHITE
CABINETS**

Miami Pure White Cabinets are designed and made in many styles and sizes. Steel is rapidly superseding wood in all bathroom equipment because it is indestructible, sanitary, more artistic and will not warp, sag, shrink or swell with changes in temperature.

The Miami Line is complete with a desirable model for any style home, hotel or apartment, from the most exclusive to the speculative tenement.

THE MASTER'S RECESS MODEL

Model No. 100 illustrated opposite is next to the DeLuxe in artistic design and is of the highest quality made. The body is constructed of extra heavy ARMCO steel, highly finished. The shelves are extra heavy bulb edge glass. The door is of heavy air cushion construction and swings on solid brass hinges. Mirror is of best quality beveled plate,—with 1 inch bevel—highly silvered and polished. Best quality glass knob.

This model is reversible for right or left hand door.

THE MASTER'S RECESS CABINET WITH LOWER RECESS SHELF

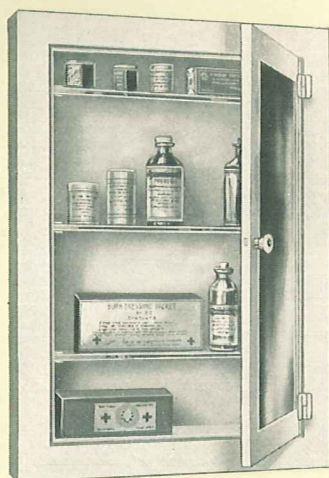

This design is of two sizes, of same body construction as the No. 100 and carries the same equipment. The model No. 1110 has a 16 x 20 mirror, the No. 110 has a 16 x 16 mirror. Mirrors are of best quality, highly silvered and have 1 inch bevel. The lower recess shelf of each is 6 inches in height. The finish is the same as the No. 100, comes in pure white. Special color may be had if desired. These models are equipped with heavy air cushion doors and solid brass hinges.

BUILDERS RECESS CABINETS

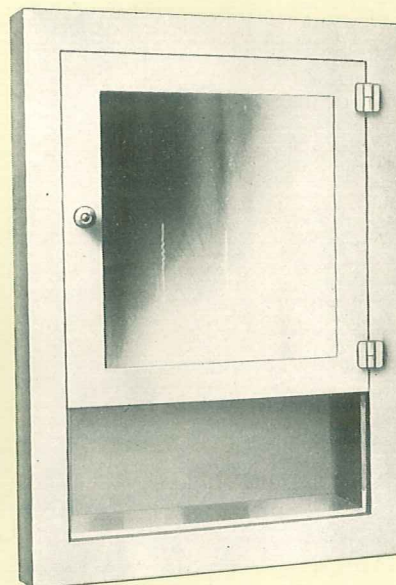

These models are especially designed for the builder and for those who want a serviceable cabinet at a moderate price. Models No. 350, No. 300 and No. 400 are of the same construction and identical except for size. They are substantially built from twenty gage ARMCO metal and finished in "Crystal Snow." The door is of heavy air cushion type with brass hinges. They are equipped with best grade plain plate mirrors, white porcelain knobs and three bulb edge glass shelves.

BUILDERS RECESS CABINETS

With Lower Recess Shelf

Models No. 360, No. 310 and No. 410 illustrated opposite are exceptionally popular and especially designed for hotels and apartments. They also make a splendid installation in homes where a lower recess shelf is preferable, for tumblers and toilet articles, to wall fixtures. The doors are of the heavy air cushion type with brass hinges and white knob.

FINISH

Miami PURE WHITE CABINETS

Models No. 600—No. 700

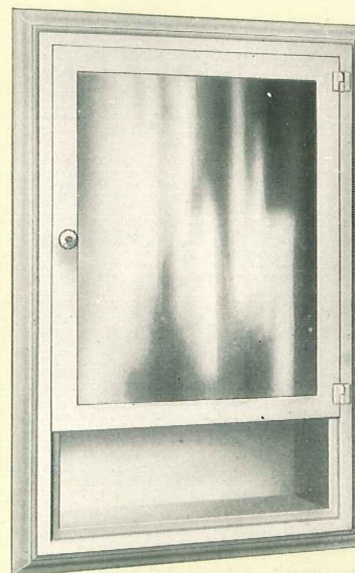

SPECIAL MOULDING TYPE CABINETS

These cabinets are very artistic in design having a $2\frac{1}{8}$ specially designed moulding around the body. The No. 600 and 700 are identical except for size. With heavy door construction, best quality plate glass mirrors and "Crystal Snow" finish, they are very decorative for the home or apartment. Heavy doors and brass hinges. Regular specifications are pure white, but special tints to match tile may be had at a slight additional cost.

SPECIFICATIONS	Model 600			Model 700

"THE FINISH THAT WILL NOT RETAIN A STAIN"

Miami PURE WHITE CABINETS

ACCESS TYPE CABINETS For Hotels and Apartments

These models are designed so as to afford entrance to plumbing wells and are especially adapted for hotels and apartment buildings. The body opens full 180 degrees to furnish ready access to plumbing well. The cabinets are fitted with a screw catch which holds the body firmly in place and at the same time may be opened immediately

and without difficulty or the necessity of using a key. The body swings out on a separate pair of brass hinges and can be operated without disturbing the contents of the cabinet. The access cabinets come fully equipped and ready for installation. They eliminate the necessity of installing a separate buck which is always troublesome and expensive.

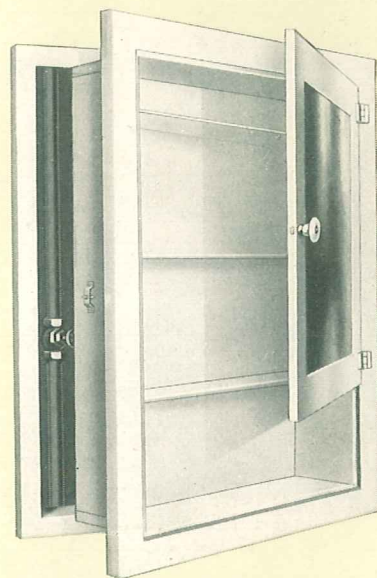

Access Type Cabinets may be had in any cabinet model except the DeLuxe and DeLuxe Jr. Where this type is used, you merely add 1½ inches to the width and height of the wall opening of the cabinet desired and other specifications of the cabinets will apply.

The Recess Mirrors are also furnished in the access type where a full cabinet is not desired.

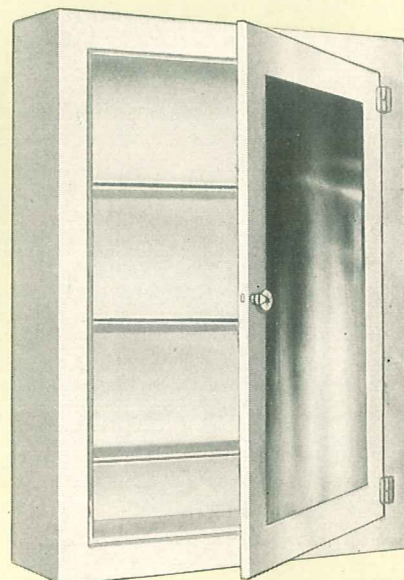

WALL TYPE CABINETS

MIAMI WALL CABINETS for the bathroom, kitchen, or pantry are designed for hanging on the surface of the wall where it is impossible to make a recess. The general construction is the same as the recess type—made of ARMCO metal and finished in "Crystal Snow." These models are equipped with heavy air cushion door with solid brass hinges, furnished with three bulb edge glass shelves. They are especially designed to hang on brick walls or thin partitions.

"THE FINISH THAT WILL NOT RETAIN A STAIN"

Models No. OSWE—No. OSW

Miami PURE WHITE MIRRORS and COMBINATIONS

MILADY'S DRESSING MIRROR

For the dressing room, boudoir or over the lavatory—this model is especially designed as a first aid to "Milady's Toilet."

Constructed from heavy ARMCO metal and highly finished in beautiful "Crystal Snow"—it is as ornamental as it is useful. The master mirror is of highest quality plate glass 18 x 24 in size with a one inch bevel. The wing mirrors are of same high quality bevel plate. The model OSWE is equipped with pull chain sockets and frosted spiral globes on each wing. This model may also be had without the lights by specifying Model OSW.

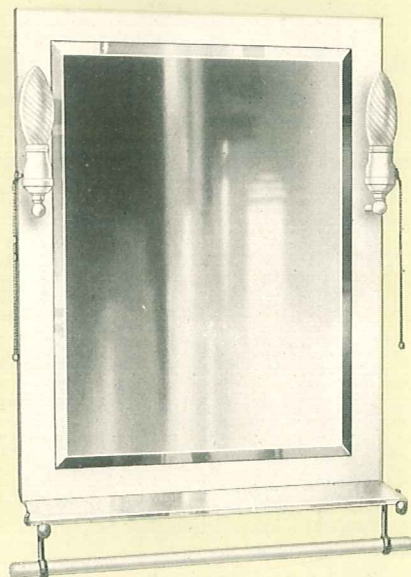

In addition to its adaptability to the home, the OSWE is an ideal equipment for the beauty salon.

"THE FINISH THAT WILL NOT RETAIN A STAIN"

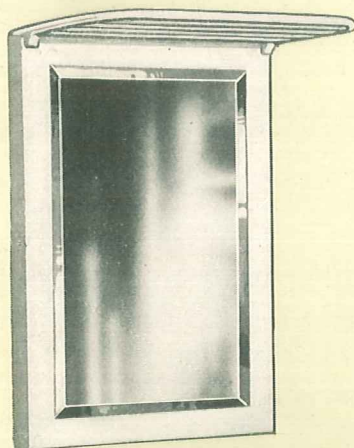

Miami PURE WHITE MIRRORS and COMBINATIONS

MIAMI RECESS MIRRORS

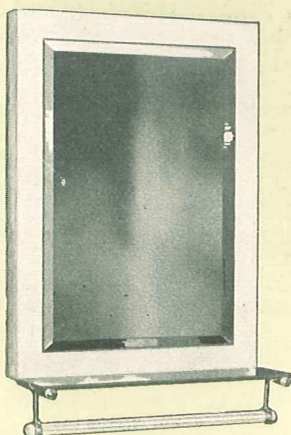

These numbers are designed for use in transient hotels and apartments where a full size cabinet is not required, the recess shelf providing ample space for toilet articles usually carried by the traveler. The material, workmanship and finish are of the same quality that characterize all Miami Products. The mirrors are heavy plain plate, highly polished, while the frames are $1\frac{5}{8}$ inches wide and $1\frac{3}{8}$ inches deep with the lower shelf only being recessed into the wall.

PURE WHITE
CABINETS

THE MIAMI LAUNDRY QUEEN

This handy Ironing Board Cabinet is constructed of heavy ARMCO metal and is made to recess into any ordinary wall between standard 16 inch center to center studding. The trim stands out just enough to harmonize with the ordinary wood work. It can be purchased in a prime coat so that it can be painted to blend with the general color scheme. It is compact, rigid, and has three adjustments for height. It has a steel body, wood board, triple height adjustment, sleeve board and electrical connection—all in one.

THE BOARD

The board is made of white wood thoroughly seasoned and with mortised and glued cross sections to prevent warping. It is 50 inches in length and 11½ inches in width and meets the most exacting conditions for general utility.

ATTACHMENTS AND ACCESSORIES

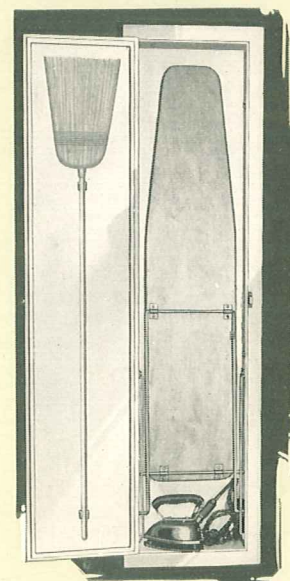

THE TRIPLE ADJUSTMENT is indeed a splendid feature. It is easily adjusted and may be set 32, 34, or 36 inches from the floor, thus insuring comfort to the operator. When the board is set for either height it will automatically drop in the same position until the adjustment is changed. The construction contains no finger pinching devices and the board cannot drop when door is opened, thus eliminating any danger of accidents.

IRON STORAGE: There is a space provided in the bottom of the cabinet which is ample and convenient for iron storage.

ATTACHMENTS: Ample space with proper holders has been provided for broom inside the door, which makes it easily accessible, and it does not interfere with the use of the board.

ACCESSORIES: A sleeve board of popular design is furnished at an extra charge. It is attached to the back wall of the cabinet.

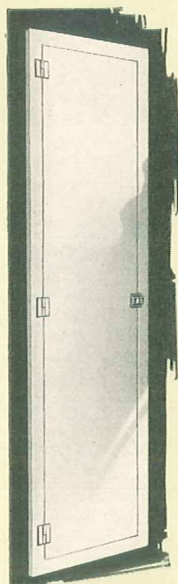

ELECTRIC OUTLET: Will be installed at a slight additional charge when so ordered. It is located in the upper left hand corner, mounted on a removable and housed-in fire-proof junction box which is easily accessible for attaching house wires or repairs.

Model IB

HINGES AND LATCH

The hinges are of solid brass finished to match the trim. There are three hinges on the door, very strong, yet neat and attractive in appearance. The latch is of the refrigerator door type, nickel plated.

THE FINISH

Standard specifications is prime coat only—one heavy coat of baked prime ready to receive the finishing coats. Finished in Pure White Baked Enamel or Miami "Crystal Snow" finish at slight extra charge.

SPECIFICATIONS	Model I B		
	Width	Height	Depth
Overall dimensions.....	16 $\frac{3}{4}$ "	63 $\frac{3}{4}$ "	5 $\frac{1}{8}$ "
Inside.....	12 $\frac{3}{4}$ "	60"	4 $\frac{5}{8}$ "
Body flange.....	1 $\frac{5}{8}$ "		1 $\frac{3}{8}$ "
Wall Opening.....	13 $\frac{1}{2}$ "	60 $\frac{1}{2}$ "	3 $\frac{3}{4}$ "

Board—Length 50"—Width 11 $\frac{1}{2}$ ".

Height—The bottom of the wall opening should be 15" from the floor. This will bring the board 32" from the floor when adjusted to the lowest position or 34" in medium position or 36" at the highest position.

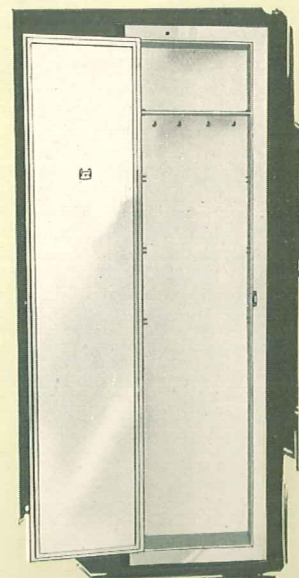

Shipping weight—Crated singly—70 lbs.

BROOM AND MOP CABINET

Model BM is the Broom and Mop Cabinet. It is identical in size and construction with Model IB without the Ironing Board attachments. Fitted with one adjustable shelf and four shelf supports. Hooks for broom, mop, dust pan, duster, dish rags, etc.

Like the Model IB the cabinet comes regularly in prime coat only. When specified it will be finished in either Baked Enamel or "Crystal Snow" at small additional cost.

See Model IB specifications above for size, wall opening, etc.

CONSTRUCTION: All Miami Products are made from ARMCO metal especially treated to prevent corrosion. The metal is skillfully and artistically formed in immense presses with dies that have been built strictly in accordance with modern engineering practice. All joints and connections are welded so that the bodies are a complete unit and cannot warp, sag, shrink or swell.

DOORS: All Miami Cabinet doors are of heavy air cushion type construction made of heavy gauge steel—they do not sag and will not break the mirror by slamming. They fit in a recess and are flush with the face of the cabinet.

MIRRORS: All Miami Mirrors are of the best quality plate glass obtainable, highly silvered and polished. They are so constructed and fitted in the door that they are water and steam proof.

FINISH: Miami Cabinets are all finished in "Crystal Snow." THIS IS NOT A BAKED ON ENAMEL but a Miami Pyroxylin Process that produces a permanent marble-like finish, non-tarnishing and absolutely proof against acids, iodine or medicine stains. The final coat is carefully buffed which brings out the high lights to a wonderful degree and presents a most delicate and pleasing surface. Any color may be had at small extra charge.

HINGES: The accompanying illustration shows the construction of the hinges used on all Miami Cabinet Doors. They are solid brass of an artistic design finished in "Crystal Snow" giving the appearance of white marble. They are very strong and durable thus insuring the proper swing and holding the door in place. Fastened with nuts and lockwashers.

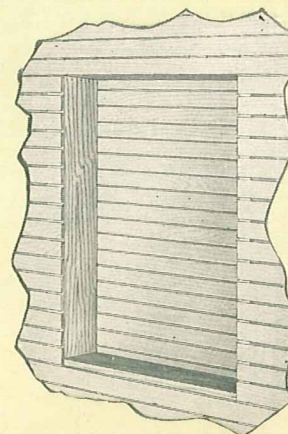

LATCH: The Miami Latch is made of brass with an adjustable spring flange housed in a neat case. It is positive in action and will not wear or become weak through constant use.

WALL OPENING: The Wall Opening for all recessed cabinets should be cut four feet from the bottom to the floor which will bring the mirror the proper height. The depth of the opening should be four inches minimum from the surface of the plastered wall.

When tile is used on the wall or for wainscoting, the cabinet should be set as usual and tile laid around flange, the mortise effect making a beautiful appearance.

In new construction a frame templet the size of opening can be inserted as a guide for the plasterer.

In setting a cabinet in an old wall, remove the plaster to size of opening required—see specifications for width—make opening up and down two inches larger, cut out lath and studs and insert headers, mortise one inch deep for studs, move studding to right or left the proper distance and nail in. If plaster cracks or chips out beyond the flange, it can be easily patched with plaster or plaster of paris.

IMPORTANT ANNOUNCEMENT

With this issue of our new catalog No. 6, we announce the new MIAMI LINE of Bathroom Cabinets, Ironing Board Cabinets, Mirrors and Mirror Combinations.

After May 1st, 1926, all Miami Bathroom Cabinets will be equipped with heavy air cushion doors. We have discontinued the thin door construction on all models.

This innovation is a continuation of our policy in keeping Miami Cabinets "ahead of the times" in anticipating the latest and most modern designs and finishes.

Standardization and volume production have made it possible for us to produce this high quality line at the same prices we have asked heretofore.

The enthusiastic reception accorded Miami Products during the past two years has been the direct cause of our phenomenal growth, and in appreciation of this, we are now passing on to the Trade your share of the benefits derived.

In looking through this catalog, we believe you will agree with us that the Line presented has never before been equalled or even approached. It is now possible to obtain, at former so-called cheap cabinet prices, a STEEL BATHROOM CABINET of real quality, construction and design.

This catalog and price list supersedes any and all others issued by this Company. After May 1st, the Miami Line will be confined to the models and specifications listed. All other models will be obsolete after this date.

To the Trade in general, we extend our heart felt appreciation and sincerely hope, that with the offering of this new Line, we will, in some small measure, have compensated you for your loyalty and past co-operation.
